REASON FOR ALLOWANCE

1. Claims 1-23 is allowed.
2. The prior art fails to teach or suggest a medallion to be worn by a user, the medallion being functional in more than one mode, the medallion comprising: an image display, responsive to input power, for providing at least one illuminated image by means of said image display; a power source, responsive to a fade-in signal and a fade-out signal, for providing the input power to the image display; mode selection means, responsive to a selection from the user who selects a mode of operation, for providing a repetitive mode selection signal if the user selects a repetitive mode; timing control means, responsive to the repetitive mode selection signal from the mode selection means, for automatically providing the fade-in signal indicative of increased power, and the fade-out signal indicative of decreased power, repeatedly as claimed in claim 1.

The prior art fails to teach or suggest a method of operating a medallion worn by a user, the medallion being functional in more than one mode, the method comprising the steps of: selecting a mode of operation, providing a repetition mode selection signal if the repetitive mode is selected, automatically providing a fade-in signal indicative of increased power, and a fade-out signal indicative of decreased power, repetitively, inputting power to an image display, providing at least one illuminated image by means of said image display in response to the power as claimed in claim 19.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
